

EAPC 2019

16th World Congress of the European
Association for Palliative Care
Global palliative care – shaping the future
23 – 25 May 2019 | Berlin, Germany

16th World Congress of the European Association for Palliative Care

Premiere: First Full Day Seminar started with more than 900 participants

Global Challenges in Paediatric Palliative Care

Children's palliative care is an emerging speciality which has many similarities to adult palliative care but also some distinct differences. In Berlin, for the first time, there will be a dedicated paediatric palliative care seminar. The paediatric palliative care scientific committee have developed an exciting programme for this inaugural event and gathered a range of interesting speakers, researchers and clinicians from throughout Europe.

The programme reflects a range of contemporary topics in children's palliative care including clinical, ethical and political issues. The programme will also include oral and poster presentations selected from submitted abstracts. We invite you to join us in Berlin to discuss, debate and network with colleagues working in paediatric palliative care from Europe and beyond.

Children's Palliative Care Topics

- Prevalence of Life-Limiting Conditions in Paediatric Palliative Care
- Information and Planning in Children's Palliative Care
- Symptom Management in Paediatric Palliative Care
- Contemporary Issues in Children's Palliative Care
- Challenges in Paediatric Palliative Care

When planning the seminar we estimated that we could have 200 registrations for the paediatric palliative care seminar. We are very excited that over 900 people have registered to attend and are really looking forward to this event.

The programme was developed in conjunction with the EAPC Task Force on Palliative Care for Children and Young People <https://www.eapcnet.eu/eapc-groups/task-forces/children-young-people> and reflects a range of issues impacting on the provision of palliative care for children and their families. The programme for Thursday 23rd May is really well-balanced with a combination of invited speakers and those whose submitted the highest scoring abstracts.

Global Challenges in Paediatric Palliative Care: An EAPC Seminar

Do, 23.05.2019, 8:00 – 18:15, ESTREL Congress Center, **Hall Europa**

Karin Dlubis-Mertens, Presse-/Öffentlichkeitsarbeit
